CAREER OBJECTIVE

Motivated B.Tech Computer Science student specializing in Big Data Analytics with 10.00 CGPA and strong interest in Generative AI, AI-powered productivity tools, data analysis, and intelligent automation. Skilled in Python, AI APIs, LangChain, backend development, cloud computing, and full-stack web technologies. Experienced in building AI-driven applications, conducting technical research, and developing scalable solutions using modern AI workflows. Seeking opportunities to apply creativity, analytical thinking, and problem-solving skills in real-world AI applications.

EDUCATION

SRM Ramapuram		2024–2028
B.Tech in Computer Science (Big Data Analytics)		
CGPA: 10.00		
BVM Global Perungudi		
Class XII	87%	2023–2024
Class X	94%	2021–2022

TECHNICAL SKILLS

AI & LLM Tools : LangChain, LangGraph, OpenAI API, Gemini API, Tavily API, Prompt Engineering, RAG, Streamlit
Programming Languages: Python, Java, C++
Software Development: Data Structures & Algorithms, OOP, REST APIs
Web Development: HTML, CSS, JavaScript, React, Node.js, Express.js, Git
Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, QuickSight, Glue)
Data & Analytics: Pandas, NumPy, Matplotlib, Power BI
Tools: Unix/Linux, Google Colab

PROJECTS

AI Data Analysis Agent (LLM and LangGraph) GitHub Link	2026
<i>Python, LangChain, LangGraph, Streamlit, Plotly, OpenAI API, Tavily API, ChatGPT</i>	
• Built an AI-driven data analysis pipeline for automated EDA, visualization, and report generation • Designed a multi-agent workflow using LangGraph and OpenAI to orchestrate multi-step data workflows • Developed a Streamlit UI for CSV/XLSX file upload, analysis selection, and interactive dashboards • Integrated competitor analysis via external APIs for business insights	
AI-Powered CareerFlow — Intelligent Recruitment & Career Development Platform GitHub Link	2026
<i>AI, PostgreSQL, Supabase, Node.js, HTML, CSS</i>	
• Developed a full-stack AI-powered job portal with role-based authentication for job seekers and employers, using PostgreSQL and Supabase for secure data and resume storage. • Built an AI Resume Matcher that parses resumes, ranks job opportunities by match percentage, and explains recommendations using skill and role analysis. • Integrated AI career assistance, including resume building, mock voice interviews with AI-generated feedback, personalized skill recommendations, and interview history tracking. • Implemented employer workflows for job posting, applicant management, and interview shortlisting, with real-time dashboard notifications for candidates. • Enhanced user experience with dynamic search highlighting, personalized dashboards, rotating motivational content, and a modular Node.js backend architecture.	

AWS Bedrock RAG Knowledge Base Project

2026

AWS Bedrock, Amazon S3, IAM, OpenSearch Serverless, Titan Embeddings, Amazon Nova, RAG

- Built a Retrieval-Augmented Generation (RAG) system in Amazon Bedrock using enterprise project datasets for context-aware AI responses
- Designed a Knowledge Base pipeline by integrating Amazon S3 as the data source with OpenSearch Serverless as the vector store
- Configured Titan Embeddings to convert documents into vector representations for semantic search and accurate retrieval
- Implemented document ingestion strategies including chunking, parsing, and embeddings for optimized knowledge retrieval
- Tested the solution using Amazon Nova models to generate accurate, project-specific answers from uploaded datasets
- Enabled scalable AI workflows where updating source documents automatically refreshes responses without model retraining

AI-Powered Data Quality Monitoring & Auto-Correction System [GitHub Link](#)

2026

Data Quality Concepts (6 dimensions), Automation, Data Visualization, Python, Streamlit, Pandas, NumPy

- Developed an AI-driven system to evaluate dataset quality across six dimensions
- Implemented validation techniques including missing value detection, outlier analysis, and duplicate identification
- Designed an interactive Streamlit dashboard for visualization, scoring, and alerts
- Built an auto-fix engine for handling missing values, duplicates, and outliers
- Enabled dataset download after cleaning for improved usability

Smart Queueing System [GitHub Link](#)

2025

HTML, CSS, JavaScript

- Developed a web-based food ordering system with real-time queue management
- Enabled users to browse menus, place orders, and track order status
- Implemented unique order IDs and QR-based verification for contactless pickup
- Reduced queue congestion using asynchronous processing and real-time updates

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- NPTEL Programming in Java – Silver Medal
- NPTEL Design Thinking with HCI - Top 5% Topper and Gold Medal
- DevOps for Absolute Beginners
- HackerRank Problem Solving and Java Certification

INTERNSHIP

RuTAG, IIT Madras

2025

Contributed to agricultural technology research by designing, collecting, and analyzing experimental datasets to support precision farming solutions.

- Engineered and preprocessed experimental datasets for agricultural trials, ensuring high-quality data for machine learning and statistical analysis.
- Performed data analysis and visualization using Python and Google Colab, extracting actionable insights for research outcomes.
- Developed technical reports and feasibility studies, documenting methodologies, results, and recommendations for project evaluation.

Internship Certificate: [View Certificate](#)

CICT – Central Institute of Classical Tamil (Govt. of India)

2026 – Present

Working on the development of an e-learning platform focused on Tamil language education and digital content delivery.

- Contributing to the design and development of a scalable e-learning website for Tamil language learners.

- Collaborating on machine learning model development for Tamil language processing tasks such as text analysis and educational assistance.
- Assisting in data preparation, annotation, and preprocessing for training language-focused ML models.
- Supporting integration of AI-driven features to enhance user engagement and personalized learning experiences.

ACHIEVEMENTS

- Conducted a frontend development workshop teaching HTML, CSS, JavaScript, and React to peers.
- Demonstrated AI-assisted development workflows using modern developer tools such as Google Stitch and Claude.
- 100 Days of Code: Python – Dr. Angela Yu
- Full-Stack Web Development Bootcamp – Dr. Angela Yu
- HackerRank Python Bronze Badge (2 Star)
- HackerRank C++ Gold Badge (5 Star)
- NPTEL Introduction to Operating System
- Working on a Research Paper

WORKSHOPS

- Participated in AWS with Cloud Computing and Mastering Big Data Analytics Workshop
- Collaborated in a hands-on IoT Workshop in IITM Research Park using Raspberry pi
- Competed in the Intbot'25 Web Development Event
- Attended a Data Science and Big Data Workshop, gaining exposure to big data tools such as Hadoop and Apache Spark
- Presented in an event “Paper Presentation - AI in Chemistry”
